SUMMARY

Full-Stack Developer with over a year of professional experience across three roles: FastAPI backend work, a React and Express e-commerce build, and an active role at 4Dimension. Comfortable across the stack. Currently deepening React and frontend skills specifically, since that is the direction I want to specialize in next. Ships real projects outside of work too, from a self-built portfolio SPA to systems-level Linux tooling.

WORK EXPERIENCE

Full-Stack Developer, 4Dimension (2026-Present, transitioning to a Candidate Engineer role for Fall 2026, one semester)

- Redesigned the frontend and backend of Poultrycareai.com
- Worked on the companion Flutter mobile app
- Currently expanding the platform into a full ERP system

Full-Stack Developer (FastAPI), Tourboard / E-Kalite (Mandatory Internship, 1.5 months, 2025)

- Developed backend services using FastAPI, designed database operations and API endpoints
- Implemented frontend data flow and error handling
- Gained experience in corporate Git workflows and project development processes

Full-Stack Developer Intern, Polgen and Sentebiolab (Biomedical Company) (5 months, 2024)

- Built and delivered a fully functional e-commerce web app: React, Express, PostgreSQL, JWT auth, admin role, Excel/CSV export
- Worked on backend to frontend integration and API development, conducted system testing and bug validation
- Prepared the system for production with real user data

Freelance Designer and No-Code Web Developer (2019-2022)

- Designed logos and user interfaces, built promotional websites on no-code platforms

PROJECTS

Personal Portfolio (mohamedattiadev.github.io): Vanilla JS SPA with no framework or bundler. Custom History API router, EN/TR/AR i18n with RTL support, offline ready via Service Worker, live GitHub API project feed, CI/CD through GitHub Actions.

Teknofest 2026 IHA, kokpit-uav (AYBU team project): Autonomous precision delivery drone with biometric verification, written in Python.

Hintium: Keyboard driven control of the Linux desktop (X11 and Wayland) through accessibility APIs. Click, scroll or search any UI element without touching a mouse. Python.

ATI-OS: Preconfigured Arch Linux and qtile desktop distribution with 22 system-wide themes, a guided installer for USB or existing installs, and a custom package picker.

University Management System, Database Project (Group): Designed ER diagrams and converted them into relational models, then integrated the database with the backend and UI. Documented the whole system in 140+ pages.

Academic coursework: xv6 kernel development (process management, system calls, scheduler analysis, low-level C); Checkstyle refactoring using design patterns and static analysis rules.

SKILLS

React, JavaScript, TypeScript, Next.js, Node.js, FastAPI, Flutter, Python, Java, C, C++, HTML, CSS, Tailwind CSS, PostgreSQL, SQL, Git, Linux, REST API design, JWT auth, Design Patterns, ER Modeling

EDUCATION

Ankara Yildirim Beyazit Universitesi, Ankara, Turkiye. Expected graduation 2027, GPA 3.47.

Uluslararası Prof.Dr. Muhammed Hamidullah Anadolu Imam Hatip Lisesi, Ankara, Turkiye. 2022, grade 96.5%.

CERTIFICATIONS

Leeds University Coding Institute, Programming Fundamentals (2021). King's College London, Engineering Skills and Teamwork (2021). Patent Development Project, patent ownership rights obtained (2020-2021). eTwinning Technology Project (2019).
